

## **FALL CREEK REGIONAL WASTE DISTRICT**

July 15, 2016

### **Notification of Sanitary Sewer Rehabilitation work in the Town of Pendleton**

The Fall Creek Regional Waste District (FCRWD) is in the process of making improvements to portions of its sanitary sewer system within the Town of Pendleton. The purpose of this project is to improve the performance of the sewer system, extend its service life and reduce the amount of extraneous water that enters the pipes. The project includes replacing and or lining the mainline sewers and replacing many of the older individual service lines on customer's private property.

Currently, we are getting ready to start the construction of Phase I of the project in July which will last through March 2017. We are also starting the design work on Phase II and anticipate construction starting in the spring of 2017 and continuing through the middle of 2018.

Phase I generally includes areas outside of the downtown along Pendleton Ave, Broadway Ave., East Water Street, East & West Central Way, SR 67, East Street and Falls Park Road. Phase II includes mostly areas to the South of downtown Pendleton. A map showing the locations affected by each project is posted on our website @ [www.fcrwd.com](http://www.fcrwd.com).

It is important to us to keep you, the residents, as informed as possible through this process. We appreciate your consideration and cooperation in advance.
